INDEX* TO VOLUME XXXI.

A

Academy, National. 481.
Agassiz, sea-bottom deposits off E. N. America, 221.
Air, separation of liquefied, 148.
Ardissone, F., Phycologia Mediterranea, 479.
Arthur, T. C., Plant Dissection, 477.
Ashburner, C. A., Pennsylvania Geology, 227, 228; Geology of Natural Gas, 309; Oil regions, 480.
Asteroids, see *Planets*.
Astronomical Society medals, 408.

B

Baillon, Dictionnaire de Botanique and Histoire des Plantes, 315.
Ball, J., Flora of Peruvian Andes, 231.
Barker, G. F., chemical and physical abstracts, 57, 148, 216, 308, 389, 486.
Battery, galvanic, see *Electrostatic*.
Barus, C., properties of iron carburets, 67; structure of tempered steel, 386; strain-effect of sudden cooling on glass and steel, 439.
Becker, G. F., theorem of maximum dissipativity, 115; new law of thermochemistry, 120; Cretaceous metamorphic rocks of California, 348.
Bell, L., ultra-violet spectrum of cadmium, 426.
Binney, W G., Land Shells, 157.
Blakesley, T. H., Alternating currents of Electricity, 154
Blake, W. P., meteorite from Tennessee, 41; Gold in nature, 477.
Botanische Zeitung, 406.
Botanical necrology, 12, 302, 316.
BOTANICAL WORKS NOTICED—
Botany of Rocky Mountain region, Coulter, 76; Botany of Japan, 478; Dictionnaire des Plantes, Baillon, 315; Drugs, etc., Lloyd, 313; Erythrææ exsiccatæ, Wittrock, 237; Flora Brasiliensis, Eichler, 158; Handbook of Plant Dissection, 477; Histoire des Plantes, Baillon, 315; Histoire des Var. et Espèces de Vignes, etc., Millardet, 158; Leerback, De Vries, 314; Phycologia Mediterranea, 479; Synoptical Flora of N. America, Gray, 238.
BOTANY—
American Desmidieæ, 478; Andean Flora, Ball, 231; Curtis's Botanical work, 159; France, plants naturalized in, 315; Hepaticæ Amazonicæ, etc., Spruce, 238; Leaves, Juncaceæ, Buchenau, 237; nomenclature of fossil, Nathorst, 236; Notarisia, 479; Plasmolytic studies, 157; Tendril movements, *Penhallow*, 46, 100, 178; Tentacles of Drosera, De Vries, 406; Thalictrum, Lecoyer, 235. See further under GEOLOGY.
Brongniart, C., Fossil Insects, 156.
Buchenau, F., European Juncaceæ, 237.
Butler, A. A., Tripyramid slides, 404.
Butler, A. P., South Carolina, 73.

C

California, Report of State Mineralogist, 76.
Campbell, J. L., and *H. D.*, on Rogers's Geology of the Virginias, 193.
Carhart, H. S., direct and counter electromotive forces, 95; surface transmission of electrical discharges, 256.
Carus, J. V., Faunæ Mediterraneæ, 238.
CHEMISTRY—
Bacterium aceti, chemical action of, 472; Carbon monoxide and water vapor, action of, 151; Carbon monoxide, combustion of, 392; Chlorine monoxide, 57; Cocaine and its homologues, synthesis of, 153; Conine, synthesis of, 471; Germanium, new element, 308; Hydrocarbons of marsh-gas series, physical properties of, 471; Hydrogen, combustion of, 392; Lupanine, 58; Magnesium carbonate, new, 57; Mercury, vapor pressure of, 218; volatility of, 308; Nitrogen, atmospheric, fixation of by soils, 391; Nitrogen dioxide, preparing, 151; Nitryl chloride, existence of, 469; Oxygen, continuous production of, 391; Phenol constituents of blast furnace tar, 220; Raffinose in barley, 220; Sodium carbonate, conversion into hydrate by lime, 219; Sulphur, volatility of, 308; Vanadium, determination of, 471; Zirconium, new oxide of, 470.

* This Index contains the general heads BOTANY, CHEMISTRY, GEOLOGY, MINERALS, OBITUARY, ROCKS, ZOOLOGY, and under each the titles of articles referring thereto are mentioned.

* This Index contains the general heads BOTANY, CHEMISTRY, GEOLOGY, MINERALS, OBITUARY, ROCKS, ZOOLOGY, and under each the titles of articles referring thereto are mentioned.

Chemistry, new law of thermo-, *Becker*, 120.
Clarke, F. W., minerals of Litchfield, Maine, 262.
Clarke, J. M., Devonian faunas of New York, 404.
Clarke, L., and H. Sadler, Star-guide, 407.
Clerke, A. M., History of Astronomy, 406.
Climates, Croll's hypotheses of, *Woeikof*, 161.
Comets (Fabry) and (Bernard), 238; story of Biela's, *Newton*, 81.
Cope, E. D., Upper Miocene in Mexico, 301.
Coulter, J. M., Manual of Botany, 76.
Croll, J., hypotheses of geological climates, *Woeikof*, 161; Climate and Cosmology, 405.
Cross, W., topaz and garnet in rhyolite, 432.
Crystals, force function in, 69.

D

Dagincourt, Annuaire Géologique, 72.
Dana, J. D., Lower Silurian fossils from the original Taconic, 241; Arnold Guyot, 358; explosive volcanic eruptions, 395; eruption of Kilauea, 397; early history of Taconic investigation, 399.
Darton, N. H., Upper Silurian in Orange Co., N. Y., 209.
Davis, W. M., Earthquakes in New England, 408.
Dewey, C., on the Taconic. 399.
Dickerson, E. N., Henry and the Telegraph, 69.
Dilatancy of media composed of rigid particles in contact, 216.
Dissipativity. theorem of maximum, *Becker*, 115.
Dwight, W. B., fossiliferous Potsdam at Poughkeepsie, 125; fossils from Canaan, N. Y., 248.

E

Eaton, A., Geological work, 399.
Eichler, Flora Brasiliensis, 158.
Einhorn, A., Force function in Crystals, 69.
Electrical discharges, surface transmission of, *Carhart*, 256.
Electromotive forces, direct and counter, *Carhart*, 95.
Electrostatic Battery, 153.
Exhibition of implements against cryptogams and parasites, 160.
Eyerman, J., Triassic foot-prints, 72.
Emmons, E., at Williams College, 399; work on Taconic, 241.

F

Farlow, W. G., botanical notices, 479
Ford, S. W., fossils from Taconic of Emmons, 248; Silurian Brachiopod, 466, 481.
Frazer, P., Congress of Geologists, 154, 403, 481.

G

Garman, S., Living Cladodont Shark, 73,
Gas Analysis, Hand-book of, Winkler. 153.
Gases, critical temperatures and pressures of, 389; law of flow. 468.
Geological Congress, notice of Frazer's report, 154, 403, 481.
GEOLOGICAL REPORTS AND SURVEYS—
Antigua, 226; China, 71; New York, 311; Pennsylvania. 70, 227; South Carolina, 73; Swedish, 71; United States, 229, 310. 401; Virginias, 193; Washington and vicinity, 473.
Geological Society medals. 408.
GEOLOGY—
Arachnidan, Carboniferous, 310; Archæan, Penokee-Gogebic series of, *Van Hise*, 453.
Brachiopod, Silurian, *Ford*, 466.
Cervus Americanus, 72; Coteau, Missouri, 69; Cretaceous in northwestern Canada, 155; Cretaceous metamorphic rocks of California, 348.
Deposits of animals, making, 398; Devonian faunas of New York, 404; Dinichthys from Ohio, 405; Dinocerata, new, *Scott*, 303; Drift sands in Maine, *Stone*, 133.
Foot-prints, Triassic, *Eyerman*, 72.
Gas. natural in Pennsylvania, 309; Gas-wells on anticlinals, *White*, 393.
Helderberg, Lower, in New York, *Williams*. 139.
Insects, earliest winged, 71.
Lake Bonneville, *Gilbert*, 284; Leaves, determination of fossil, *Ward*, 370; in Staten and Long Island clays, 403; nomenclature of fossil, 236.
Mastodon, llama, etc., from Florida, 403; metamorphism in California Cretaceous, *Becker*, 348.
Olenellus (?) Kjerulfi, *Matthew*, 472; Ore deposits, 474; Ostracoda from Colorado, 404.
Palæocrinoidea, revision of, 311; Potsdam, at Poughkeepsie, N. Y., *Dwight*, 125; Pteropod, St. John Group, *Matthew*, 72.
Quartzite, formation of. *Irving*, 225; Quaternary of Utah, *Gilbert*, 284.

GEOLOGY—
Scorpion, fossil, 228; Silurian, Upper, in Orange Co., N. Y., *Darton*, 209; Slaty cleavage, 475.
Taconic, of Canaan, N. Y., fossiliferous, *Dana*, 241; *Ford* and *Dwight*, 248; early history of Taconic investigation. *Dana*, 399; Tertiary of Mississippi and Alabama, *Langdon*, 202; Upper Miocene in Mexico, 310; Titanichthys from Ohio, 405.
Genth, F. A., Contributions to Mineralogy, 229.
Germanium, new element, 308.
Gibbs, J. W., notice of Astronomical Papers, 62; notice of Ketteler's Theoretische Optik, 64.
Gilbert, G. K., scientific method and geology of Utah, 284.
Glaciers in U. S., existing, 310.
Glass, strain-effect of sudden cooling in, *Barus* and *Strouhal*, 439.
Goldschmidt, V., Index der Krystallformen, 475.
Goodale, G. L., botanical notices, 157, 406.
Goode, G. B., Fishery Industries, 407.
Gray, A., botanical necrology, 12, 312, 316; botanical notices, 76, 158, 231, 313, 477; Synoptical Flora of N. A., 238.

H

Hall, A., Nova Andromedæ, 299.
Hall, J., Palæontology of New York, 311.
Hanks, H. G., Report of Mineralogist of California, 76.
Harker, A., Slaty cleavage, 475.
Hazen, H. A., Thermometer Exposure, 320.
Heat-spectra, invisible, *Langley*, 1.
Herrick, C. L., Bulletin of Dennison University, 317.
Hidden, W. E., meteoric irons, 460.
Hooker, Sir J., retired, 77.
Hull, C. E., Pennsylvania Geology, 227.
Huntington, O. W., Crystallographic Notes, 74.
Hussak, E., Rock-forming Minerals, 156.
Hyatt, A., larval theory of origin of tissue, 332.

I

Iddings, J. P., columnar structure in igneous rock, 321.
Iron carburets, properties of, 67, 386.
Iron in magnetic field, chemical behavior of, *Nichols*, 272.
Irving, R. D., formation of quartzite, 225.

K

Ketteler, E., Theoretische Optik, 64.
Kunz, G. F., meteoric iron from West Virginia, 145; Mineralogical Notes, 74.

L

Lagerheim, G., Desmidieæ, 478.
Lamic, J., Plants naturalized in southwest of France, 315.
Langdon, D. W., Jr., Tertiary of Mississippi and Alabama, 202.
Langley, S. P., invisible heat-spectra, 1.
Lea, I., Bibliography of, 239.
Lecoyer, J. C., Monographie du Thalictrum, 235.
Lesley, J. P., Pennsylvania Geology, 228.
Light-absorption and molecular structure, 58.
Light, velocity of, *Michelson*, 62; *Michelson* and *Morley*, 377.
Light, zodiacal, *Searle*, 159; relation to Jupiter, 318.
Liquids, surface tension of, *Magie*, 189.
Lloyd, J. M., and C. G., Drugs and Medicines of N. America, 313.
Lydekker, R., Fossil Mammalia, 405.

M

Magie, W. F., surface tension of liquids, 189.
Magnetic field, chemical behavior of iron in, *Nichols*, 272.
Magnetization by electric discharge, 61.
Matthew, G. F., Pteropod, St. John Group, 72; Olenellus (?) Kjerulfi, 472.
McRae, A. L., electrostatic battery, 153.
Meteoric iron from West Virginia, *Kunz*, 145; Tennessee, *Blake*, 41; Arkansas and South Carolina, *Hidden*, 460.
Meteorites, catalogue of, 476.
Meteors of Nov. 27, 1885, *Newton*, 78, 409.
Michelson, A. A., velocity of light, 62; influence of motion of medium on velocity of light, 377.
Millardet, A., work on American grapes, 158.
Mineralogist's Report, California, 76.
MINERALS—
Albite, 265. Annabergite, 230. Argentobismutite, 229. Argyropyrite, 308. Arsenopyrite, 229. Aurichalcite, 75. Avalite, 230. Azurite, 74, 75.
Beegerite, 229. Brookite, Arkansas, 387. Brucite, artificial, 311.
Cancrinite, 263. Cappelenite, 230. Chrysocolla, 75. Cosalite, 229.
Elæolite, 262. Emmonsite, 476.
Fayalite, slag with composition of, 405.
Galenobismutite, 229. Garnet in rhyolite, 432.
Hudsonite, 29. Hydrogiobertite, 477. Hydronephelite, 265. Hypersthene, 38.

MINERALS—
Joseite, 229.
Kainosite, 476. Kobellite from Colorado, 73.
Lavenite, 230. Lepidomelane, 265. Limonite, pseudomorphs after pyrite, 376.
Malachite, 75.
Ore-deposits, theory of, 474.
Pinnoite, 230. Polyarsenite, 230. Polybasite, 229. Pseudo-chrysolite, 75.
Quartz, compound crystals, 74.
Sanidine, 434. Sarkinite, 230. Serpentine formations in California, 348. Sodalite, 264. Spessartite, 434. Strengite, artificial, 311.
Tetrahedrite, 229. Topaz in rhyolite, 432. Tourmaline locality in Maine, 75.
Uintahite, 231. Vanadinite, 230.
Minerals, artificial, 311.
Mitchell Scientific Society, 480.
Molecular structure and light-absorption, 58.
Morley, E. W., influence of motion of medium on velocity of light, 377.
Mountain slides, Tripyramid, 404.
Murray, J., bottom deposits from Blake dredgings, 221.

N

Nathorst, Nomenclature of fossil Leaves, 236.
Nebula, Nova Andromedæ, *Hall*, 299; in the Pleiades, 318.
Newberry, J. S., adaptation in Cicada, 316.
